

CareChain – Transparent & Accountable Social Aid Platform

Problem Statement

Social welfare and charitable aid systems often suffer from lack of transparency, inefficient fund distribution, fraud, and limited accountability. Donors rarely know how their contributions are used, beneficiaries struggle to access help with dignity, and field verification is fragmented or manual. These gaps reduce trust, slow down aid delivery, and limit real social impact.

There is a critical need for a secure, transparent, and role-based digital platform that directly connects donors with verified beneficiaries while ensuring accountability at every stage of fund utilization.

Project Description

CareChain is a role-based social impact platform designed to ensure end-to-end transparency in charitable donations. It enables donors to track how their contributions are utilized, allows beneficiaries to request and receive aid with dignity, empowers field workers to verify needs on the ground, and provides administrators with tools to govern the ecosystem securely.

The platform uses milestone-based fund release, real-time proof of utilization, and role-based access control to prevent misuse of funds. By integrating technology, human verification, and transparent reporting, CareChain builds trust among all stakeholders and ensures that aid reaches the right people at the right time.

Stakeholders / User Roles

- Guest (Public)
- Donor
- Beneficiary
- Field Worker
- Admin

Role-Based Features

1. Guest (Public User)

Purpose: Awareness, trust, and engagement

- View active aid campaigns
- Browse anonymized beneficiary stories
- View platform-wide impact metrics
- Read transparency and fraud-prevention policies
- Search and filter causes
- View success stories and reports
- Submit feedback or inquiries

2. Donor

Purpose: Transparent and confident giving

- Donor profile and preferences
- Browse and filter verified causes
- One-time and recurring donations
- Donation history and receipts
- Real-time fund utilization tracking
- Milestone-based progress updates
- View proof of fund usage (photos, documents)
- Impact reports (auto-generated)
- Donor anonymity controls
- Notifications and alerts
- Emergency fund participation

3. Beneficiary

Purpose: Dignified access to support

- Assisted onboarding and profile creation
- Submit funding requests
- Upload verification documents
- Track request and fund status
- Receive funds in approved milestones
- Submit progress updates

- Privacy and consent controls
- Multilingual and accessibility support
- Communicate with assigned field worker/admin
- Feedback and grievance submission

4. Field Worker

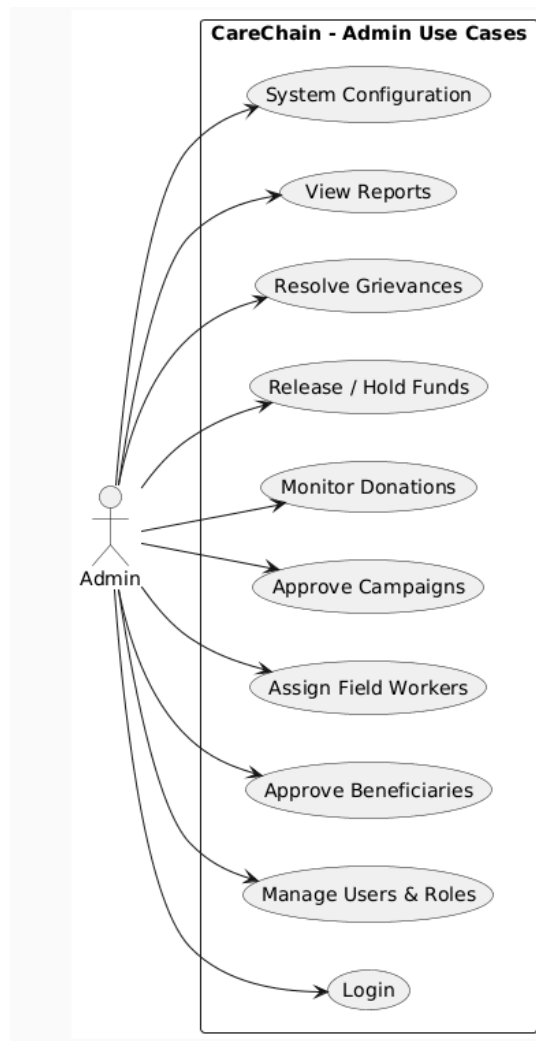

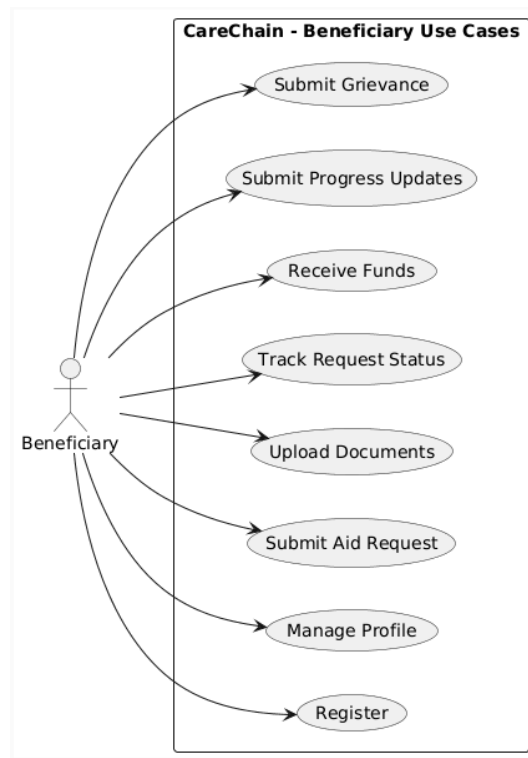

Purpose: On-ground verification and monitoring

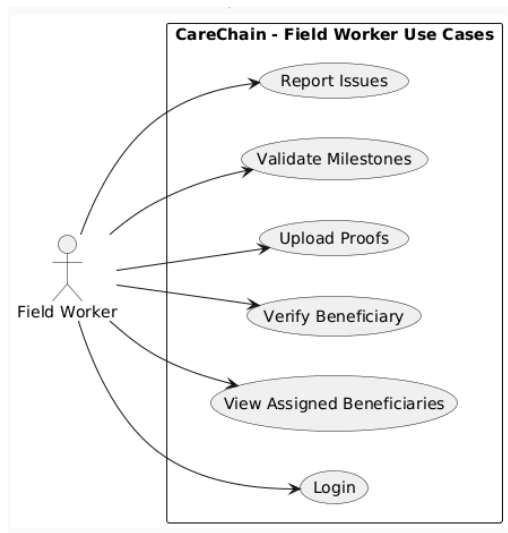

- Secure role-based access
- View assigned beneficiaries
- Conduct need verification
- Geo-tagged photo and document uploads
- Offline data capture and sync
- Milestone validation
- Visit scheduling
- Fraud or discrepancy reporting
- Activity and audit logs

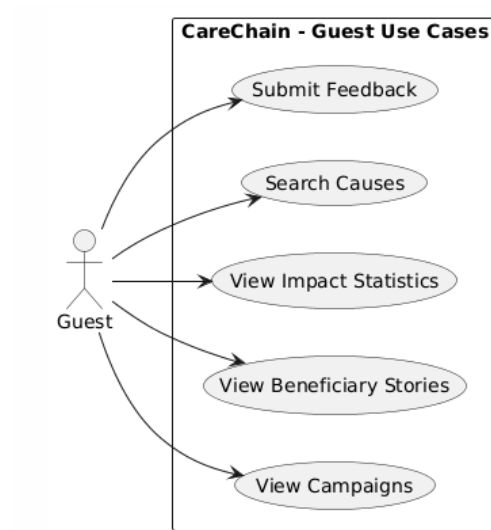

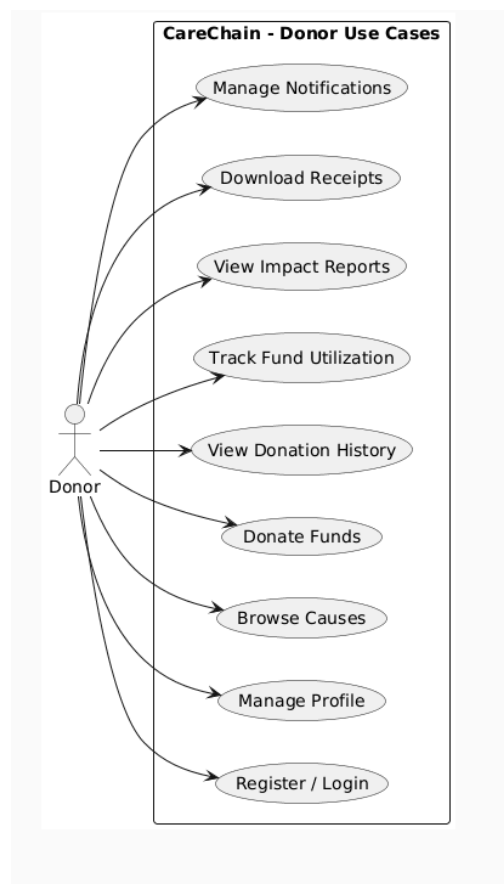

5. Admin

Purpose: Governance and platform integrity

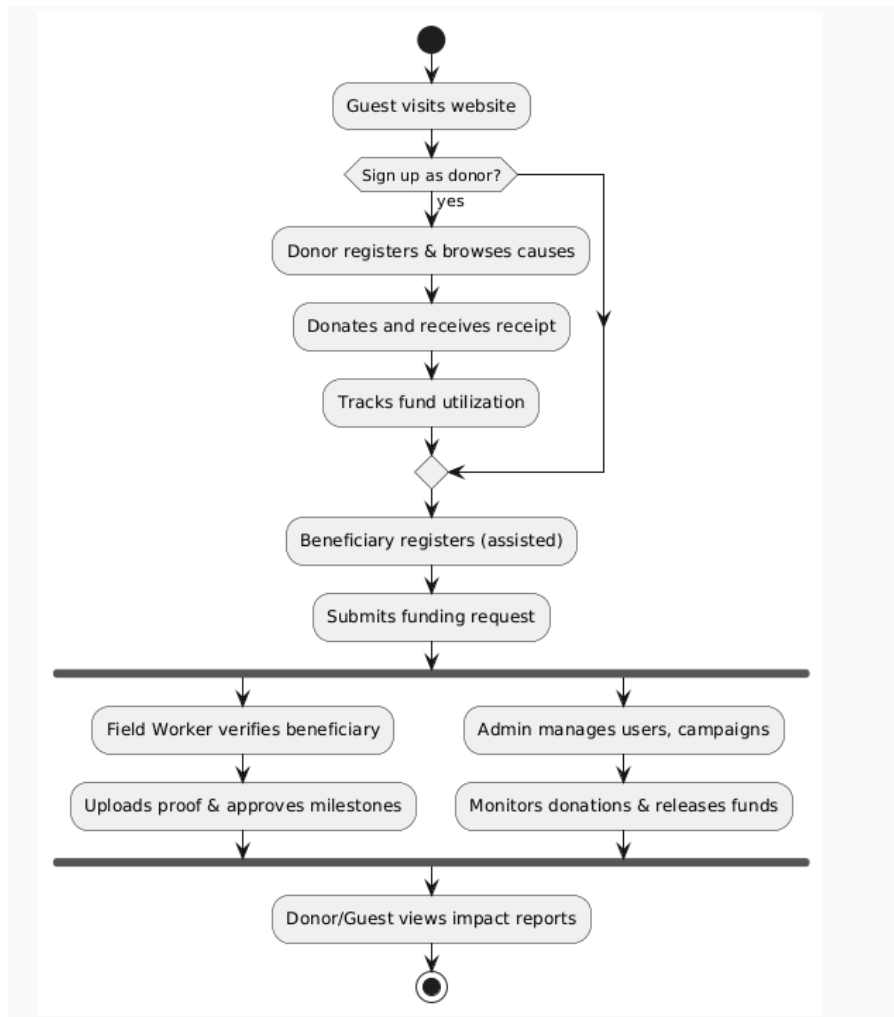

- User and role management
- Beneficiary and field worker approval
- Campaign and fund request approval
- Donation flow monitoring
- Manual fund release or holds
- Fraud detection and escalation
- Content moderation
- Grievance resolution
- Audit logs and reports
- Platform analytics dashboard
- Compliance and data export tools

Workflow

Relevant UN Sustainable Development Goals (SDGs)

SDG 1 – No Poverty

- Direct financial assistance to individuals and families in need.

SDG 3 – Good Health and Well-Being

- Enables funding for medical treatment and healthcare access.

SDG 4 – Quality Education

- Supports educational aid such as fees, supplies, and scholarships.

SDG 10 – Reduced Inequalities

- Improves access to resources for underserved communities.

SDG 16 – Peace, Justice, and Strong Institutions

- Promotes transparency, accountability, and trust in social systems.

SDG 17 – Partnerships for the Goals

- Connects donors, volunteers, and administrators on a single platform.
